PROFILE

Motivated Junior Front-End Developer specializing in **Angular** and **TypeScript**. I focus on building responsive, user-friendly web interfaces with clean architecture and reusable components. Strong understanding of **REST APIs**, UI layout, and Git version control. Passionate about learning, improving, and contributing to real development teams.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS, Bootstrap

Frameworks: Angular, Angular Material, Bootstrap

Tools: Git, GitHub, npm, VS Code

Concepts: Component Architecture, Responsive Design, API Integration

PROJECTS

- **Hong Kong Chinese Restaurant (Restaurant Management System)** Built using Angular with features like printing receipts, adding/editing menus, and Firebase backend. Dashboard UI with modern design.
- **Drive Align (Workshop Booking Web App)** Users can book car repair jobs, upload damage photos, and track issues. Backend in Firebase with a modern and clean interface.

EXPERIENCE

Front-End Internship

“Currently focused on personal development and building Angular projects to strengthen technical foundation.”
